

## ICOM North America Supports Freightliner S2G and C2 School Buses Propane Vehicles with Remanufactured Engines and Parts

*New Hudson, Michigan – February 25, 2025* – ICOM North America, is proud to announce its continued commitment to the propane vehicle market by offering top-tier support for Freightliner S2G and C2 8.0L & 8.8L gasoline and propane-powered trucks. Our innovative Remanufactured Engines and our Transmission, Auto Parts (Ignition – Catalytic Converters – Engine Parts and more) and Propane Parts, ICOM provides unparalleled service to propane marketers, ensuring reliable and sustainable performance for their fleets.

As an industry leader in propane vehicle technology, ICOM North America extended its expertise to Freightliner S2G and C2 customers by supplying high-quality remanufactured engines, transmissions, and propane parts. This offering is designed to keep propane-powered vehicles running smoothly, reduce maintenance costs, and improve operational efficiency. The ICOM supply and support for this segment has been very successful and in place for over a year, benefiting both Thomas school bus fleets and Freightliner S2G users.

### **Key Benefits for Propane Marketers:**

- **Technical Support for the propane S2G and C2:** ICOM provides technical support to ensure optimal performance and troubleshooting for all Icom products and services. Our support team is highly trained to assist you.
- **Enhanced Propane Parts Selection:** For the Propane S2G and C2 School Bus ICOM also offers a range of propane-specific components including: fuel systems components and replacement propane tanks for the S2G ensuring a seamless experience for fleet owners seeking complete vehicle care.
- **Extended Engine Warranty:** ICOM's remanufactured engines and transmission systems are specifically tailored for Freightliner S2G & C2 propane and gasoline vehicles, ensuring compatibility, durability, and peak performance. ICOM offers a 3-year/100,000-mile limited warranty on its remanufactured engines and transmissions, providing peace of mind and long-term support to fleet owners.

"We have been dedicated to providing essential support to propane marketers, ensuring their bobtails stay on the road despite a market with limited resources and parts. Through strong partnerships, we have successfully addressed the challenges of the S2G and C2 School Bus, for both gasoline and propane versions, and now offer a variety of parts and engines to keep them running smoothly." Says Albie Venezia Director of Technical Services at ICOM North America.

"Recognizing the high demand and wait times for 8.0L and 8.8L gasoline and propane engines and parts, we offer cost-effective, reliable, OEM-quality remanufactured

engines with a fast 3–5-day turnaround. Each engine undergoes a thorough overhaul—disassembled, inspected, cleaned, and rebuilt to meet or exceed OEM standards—ensuring like-new performance and extended lifespan.” Brandon Thorn Engineering Manager.
